ALIGNING PURPOSE

CONSULTANCY RESOURCES

Through this consultancy, ChurchLife! hopes to help churches grow to the next level of ministry organization...

WHERE TO BEGIN? DIAGNOSTICS...

CHURCH-HEALTH SNAP-SHOT

Walking through your church over a period of one month at several platforms, using a combination of observation, study and focus-group interviews, ChurchLife! can evaluate church ministries based on key-health pillars, and make certain recommendations for your church to grow towards for the future.

This approach has roots in Edgar Schein's Organizational Model, known by many as the father of Organizational Philosophy. It was used in Philip's doctoral dissertation.

LEADERSHIP ARCHITECTURE AND RENEWAL

LEADERSHIP ARCHITECTURE DESIGN

Does your church have enough leaders? Are leaders being grown from the inside out?

A healthy tree with good fruits belies healthy branches, trunk and roots. Good leaders grow out of a process of developing leaders right from growing members of the church.

Through focus-groups, this consultancy will design a multi-level leadership development process for the church from "job-descriptions" to curriculum proposals, to ensure people grow to leadership through the various levels. The consultancy can then play roles in implementing this process through vision-casting, mentoring and teaching.

LEADERSHIP RENEWAL AT SPECIFIC LEVELS

Helping leaders rise up at one level is the result of successful leadership at the level one-tier above.

This consultancy seeks to help a specific level of leaders raise new successors over a period of time. It seeks to guide and coach a specific level of leaders to be mentors, to be equipped in their roles and to call people into leadership as Jesus called people to be "follow me...".

CHURCHLIFE RESOURCES

Registered Address: 35 Selegie Road #09-14/15 Parklane Shopping Mall Singapore 188307 UEN: 53230761E
Email: admin@churchlife-resources.org

This approach may be applied at any level of leadership, but notably has been applied to:

- Board member succession
- Cell leader succession

DISCIPLESHIP-PROCESS ARCHITECTURE

This consultancy studies the discipleship process of a church and analyzes how disciples are nurtured through the lens of:

- Core Product
- Core Process
- Core Programs
- Core Pastoral Leadership

Gaps and pitfalls in the process are identified and strategies applied to address them. The hope of this consultancy is to grow over time toward a robust discipleship process for members who journey in the church over time. Such a program would also have the benefit of drawing staff and board together towards a common discipleship vision.

BUILDING A WORSHIP CULTURE

LEVITICAL PROJECT

Worship is the key ministry that draws members to God as the Desire of their hearts. Working with key worship ministry leaders, ChurchLife! has designed a journey for worship teams that takes them over 6-12 months to discover their call and spiritual identity, evaluate key practices in order to develop a passion to stand in the worship office to draw people back to First Love. ChurchLife! works through training retreats, interspersed reflections and seasonal pulpit preaching to achieve this.

A project to help strengthen worship teams in their calling and spiritual formation. Such a training for the team could include:

- Teaching on the call of Spiritual Levites and the pillars of a worship ministry
- Designing a Worship project to build deeper spirituality and impact
- Preaching a series on Worship for the church

BUILDING AN EVANGELISTIC CULTURE

Evangelism is the heart of God for lost people. Working with key ministry leaders, ChurchLife! designs strategies to inspire and mobilize people for evangelism as a lifestyle. Such strategies over a period of time build momentum repeatedly in the hope of growing towards a life-style “norm” of evangelism. Such a strategy would include:

- challenge and appeal
- equipping and training in skills
- building momentum
- reaching out in an evangelistic setting

ESTABLISHING CHURCH-HEALTH AND GROWTH

INTENTIONAL INTERIM

ChurchLife! can play the role of an interim pastoral resource in addressing all the before-mentioned consultancies in a holistic way for church health. Such a holistic Church-health consultancy would address:

- Charting a discipleship process
- Strengthening the Teaching / Discipleship stations
- Strengthening the Outreach strategies
- Strengthening the Leadership development process

Putting it all together, this consultancy serves as an interim to put the church on a stronger setting for a period until stronger pastoral leadership is established to take the church to the next level.
